

# The Residences at Annapolis Junction Ride Share Program

The Residences at Annapolis Junction's ride share program promotes the use of carpooling and/ or van pooling with their residents. By reducing the number of single operated vehicles on the road we can reduce the amount of emissions that enter our environment. A single passenger car contributes approximately 4.8 metric tons of greenhouse gas each year.

Provided in this document are several different links for programs that you, as residents, may sign up for to find potential carpooling matches and resources. The Residences at Annapolis Junction has also provided a designated preferred drop off/ pick up location. A bench has been provided for the comfort of the waiting carpoolers.

## **Ridesharing and Commuter Choice Maryland**

Ridesharing is a great way to lower commuting costs, reduce congestion, improve air quality, and meet new people. Sharing a ride in a carpool, vanpool, or riding transit are some of the best ways to reduce traffic congestion and air pollution while saving money on your commute to work.
